

PVA THREAD

WATER SOLUBLE THREAD

WATER SOLUBLE THREAD

Water-soluble PVA yarn/ thread is made by a kind of vinylon fibre abbreviated as PVA. The fibre is one of the synthetic macromolecule materials with biodegradable properties. PVA thread is suitable for embroidery, sewing, patching, clothing folds, skirt folds, cuffs, pockets, trademarks and other products. It is easily dissolvable in both warm and hot water without the aid of any chemical agents.

FEATURES

- 1. Water soluble thread
- 2. Temporang Fixation

APPLICATION

- 1. Towel
- 2. Cuffs
