

EMBROIDERY THREAD

EMBROIDERY THREAD

Embroidery thread is made of polyester filament fibers, with a smooth surface, good glossiness, and high strength, making it the mainstream choice for computer embroidery. According to standards, it can be divided into two categories: original colored polyester filament embroidery thread and dyed polyester filament embroidery thread.

FEATURES

- 1. Eco friendly
- 2. High-performance
- 3. Sunscreen
- 4. Widely used

APPLICATION

- 1. High frequency washing clothing
- 2. Home textile products
- 3. High end fashion
